Approximate Scale ___ = ___

Site map must contain <u>north</u> orientation, <u>building</u> locations and <u>doors</u>, Knox box location, loading <u>areas</u>, <u>internal roads</u>, names of <u>adjacent streets</u>, <u>storm and sewer drains</u>, <u>property access and exit points</u>, <u>emergency utility shutoffs</u>, <u>evacuation staging areas</u>, <u>indoor and outdoor hazardous material handling and storage areas</u>, and <u>emergency response equipment locations</u>.

You may submit existing plot plans if they contain the elements required above, but limit detail that is not pertinent to emergency response. For large sites, use one page for an overall view, then additional pages for each hazmat-related building. It is not necessary to show the evacuation routes.
