

Sonoma County Hazard Mitigation Plan

Figure 8.3

Earthquake Vulnerability of Emergency Service Facilities

Base Map Data

- City Limit
- US Federal Highway
- State Highway
- Main Arterials
- Streams
- Unincorporated Communities

Vulnerable Areas Data

- Extremely Vulnerable
- Severe
- High
- Moderate
- Slight
- Least Vulnerable
- Active Faults

Emergency Facilities Data

- Hospital
- Police Station
- Fire Station

0 2.5 5 Miles
1 inch equals 5 miles

Map Scale and Reproduction methods limit precision in physical features displayed. This map is for illustrative purposes only, and is not suitable for parcel-specific decision making. The parcels contained herein are not intended to represent surveyed data. Site-specific studies are required to draw parcel-specific conclusions.

The Earthquake Vulnerability was calculated from accessing the potential for Liquefaction, Seismic Shaking, and Soils that have the potential for becoming highly or easily saturated within a 20-mile radius of the active earthquake faults.

No part of this map may be copied, reproduced, or transmitted in any form or by any means without written permission from the Permit and Resource Management Department (PRMD), County of Sonoma, California.

The Active Faults layer was obtained from the California Department of Conservation, Division of Mines and Geology, version 2001.
